

1. Record Nr.	UNINA9910460647103321
Autore	Richardson Ronny
Titolo	Business applications of multiple regression // Ronny Richardson
Pubbl/distr/stampa	New York, New York (222 East 46th Street, New York, NY 10017) : , : Business Expert Press, , 2015
ISBN	1-63157-060-9
Edizione	[Second edition.]
Descrizione fisica	1 online resource (195 p.)
Collana	Quantitative approaches to decision making collection, , 2163-9582
Disciplina	519.536
Soggetti	Regression analysis Commercial statistics Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Introduction -- 1. Correlation analysis -- 2. Simple regression -- 3. Multiple regression -- 4. Model building -- Notes -- Index.
Sommario/riassunto	This book describes the use of the statistical procedure called multiple regression in business situations, including forecasting and understanding the relationships between variables. The book assumes a basic understanding of statistics but reviews correlation analysis and simple regression to prepare the reader to understand and use multiple regression. The techniques described in the book are illustrated using both Microsoft Excel and a professional statistical program. Along the way, several real-world data sets are analyzed in detail to better prepare the reader for working with actual data in a business environment. This book will be a useful guide to managers at all levels who need to understand and make decisions based on data analysis performed using multiple regression. It also provides the beginning analyst with the detailed understanding required to use multiple regression to analyze data sets.
