### Sommario/riassunto

The 22 essays in this new and comprehensive study explore how notions of covenant, especially the Sinaitic covenant, flourished during the Neo-Babylonian, Persian, and early Hellenistic periods. Following the upheaval of the Davidic monarchy, the temple's destruction, the disenfranchisement of the Jerusalem priesthood, the deportation of Judeans to other lands, the struggles of Judeans who remained in the land, and the limited returns of some Judean groups from exile, the covenant motif proved to be an increasingly influential symbol in Judean intellectual life. The contributors to this volume, drawn from many different countries including Canada, Germany, Israel, South Africa, Switzerland, and the United States, document how Judean writers working within historiographic, Levitical, prophetic, priestly, and sapiential circles creatively reworked older notions of covenant to invent a new way of understanding this idea. These writers examine how new conceptions of the covenant made between YHWH and Israel at Mt. Sinai play a significant role in the process of early Jewish identity formation. Others focus on how transformations in the Abrahamic, Davidic, and Priestly covenants responded to cultural changes within Judean society, both in the homeland and in the diaspora. Cumulatively, the studies of biblical writings, from Genesis to Chronicles, demonstrate how Jewish literature in this period developed a striking diversity of ideas related to covenantal themes.

Sommario/riassunto	"This book provides a critical evaluation of the ways in which EU law engages with minority rights protection: at its core is an analysis of EU law and minority rights. Unlike the UN or ECHR, the EU has no competence to set standards on minority protection and this has been a point of disappointment for minority rights advocates. Indeed, this book will demonstrate that, in EU law, binding standards really only exist in the sphere of non-discrimination and are at their strongest in the field of employment. As such, binding standards within EU law affect only a small proportion of the canon of minority rights. However, the EU does have competence to promote diversity and facilitate redistribution of power and resources across the EU. According to a broad understanding of minority rights protection, acts of promotion and facilitation -alongside those of standard-setting - constitute essential underpinnings for minority protection. The EU's existing

competences do therefore play a key role in minority protection. In order to support these conclusions, the book undertakes a comprehensive examination of the impact of EU law on minority rights protection"--Bloomsbury Publishing.
