Sommario/riassunto	The twenty-first century will be the age of global interaction and organized patterns of networks. This important book addresses the strategic dimensions of networks, especially in transportation and information communication technology in Europe. The authors examine the challenges brought about by European unification and accession, through which a coherent and efficient European network system will need to be implemented. The topics addressed include the emergence of new network structures and strategies, the implications of European integration policies for network operations and developments, and the assessment of network synergy effects.
