Southeast Asians and the Informality of the ASEM Institution -- Conclusion: ASEM Has Delivered Significant Benefits to Southeast Asian Countries -- Epilogue: Southeast Asia and ASEM after 2008 -- REFERENCES -- Appendices -- Index -- About the Author
Sommario/riassunto	The inauguration of the Asia-Europe Meeting (ASEM) in Bangkok in 1996 was celebrated with enthusiasm and hopes in the two regions because this forum represented a breakthrough in Asia-Europe relations. The region-to-region pattern of the relations becomes the study framework that enables the explorations of central themes which include the Asian regional identity, ASEAN collective diplomatic prominence, and the informality of the ASEM institution. In exploring those central themes, this book applies constructivist, realist, and neo-liberal institutional theories consecutively. The difference between

Asian and European cooperative culture, as well as the longevity of an international institution, adds to the picture. This book contributes not only to the study of Asia-Europe relations but also to the understanding of regionalism in Asia.

Sommario/riassunto	Some of humankind's greatest tools have been forged in the research laboratory. Who could argue that medical advances like antibiotics, blood transfusions, and pacemakers have not improved the quality of people's lives? But with each new technological breakthrough there comes an array of consequences, at once predicted and unpredictable, beneficial and hazardous. Outcry over recent developments in the reproductive and genetic sciences has revealed deep fissures in society's perception of biotechnical progress. Many are concerned that

reckless technological development, driven by consumerist im
