Sommario/riassunto	The Tall al-Hamman Excavations, Volume 1 is the first in a series of reports on the Tall al-Hammam Excavation Project, directed by Steven Collins of Trinity Southwest University and assisted by Gary Byers and Carroll Kobs, assistant dig directors. Co-author Mike Luddeni has been dig photographer since the inception of the Project. Excavations began in Jordan in 2005–2006 and have continued annually, without break, up to the present. This volume presents an overview of the site, with a period-by-period overview of Tall al-Hammam and its relationship to other sites in the vicinity in the Jordan Valley. It also includes the pottery profiles and assemblages and artifacts discovered in the course of these seasons. Future volumes will include in-depth excavation reports for specific areas of the Tall.
