## Sommario/riassunto

The book begins with a section delving into foresight analysis, strategic foresight, and scenario planning. It then examines the pressing contexts and most wicked problems facing future leaders ranging from population growth and urbanization to climate change and resource competition. How can leaders create common cause and meet these issues with an eye toward peace, sustainability, and social justice? The book concludes with a series of unique ways of viewing the critical challenges facing leaders and suggests how skillsets and capacities needed to work on solutions to these challenges might
