1. Record Nr. UNINA9910460872103321 Atlas of AIDS co-infection / / edited by Jinxin Liu and Xiaoping Tang **Titolo** Berlin, Germany: Boston, [Massachusetts]: Beijing, [China]: De Pubbl/distr/stampa Gruyter:,: Tsinghua University Press,, 2016 ©2016 3-11-035394-6 **ISBN** 3-11-038790-5 Descrizione fisica 1 online resource (318 p.) Disciplina 616.9792075 Soggetti AIDS (Disease) **Bacterial diseases** Lungs - Diseases Electronic books. Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Note generali Description based upon print version of record. Nota di bibliografia Includes bibliographical references and index. Front matter -- Foreword -- Preface -- Preface of second edition --Nota di contenuto Contents -- 1. Imaging findings of bacterial pneumonia in AIDS -- 2. Imaging findings of AIDS with pulmonary Rhodococcus equi disease --3. Imaging manifestation of pulmonary candidiasis in AIDS -- 4. Imaging findings of pulmonary aspergillosis in AIDS -- 5. Imaging findings of pulmonary mucormycosis in AIDS -- 6. Imaging findings of pulmonary cryptococcosis in AIDS -- 7. Imaging features of penicilliosis marneffei in AIDS -- 8. Image findings of pneumocystis pneumonia (PCP) in AIDS -- 9. Imaging findings of pulmonary Mycobacterium tuberculosis in AIDS -- 10. Imaging findings of nontuberculous mycobaterial pulmonary infection in AIDS -- 11. Imaging findings of CMV pneumonia in AIDS -- 12. Imaging features of multiple microbial pulmonary infections in AIDS -- 13. Imaging findings of AIDS-related Lymphoma -- 14. Abdominal CT findings in

AIDS -- 15. Thoracic and abdominal imaging features of pediatric AIDS -- 16. CT diagnoses and differential diagnoses of mediastinal hilar lymphadenopathy in AIDS patients -- 17. CT diagnoses and differential diagnoses of cavitary pulmonary diseases in AIDS patients -- 18. The

Sommario/riassunto

CT diagnosis and differential diagnosis of disseminated miliary nodules in AIDS patients -- References -- Index

the Atlas of AIDS Co-infection illustrates imaging features and clinical outcomes of AIDS related diseases. The common/uncommon opportunistic infections and malignancies are well covered, including bacterial (e.g. Staphylococcus, Rhodococcus equi), fungal (e.g. Penicillium marneffei, Pneumocystis pneumonia, Pulmonary aspergillosis, Mucormycosis) and mycobacterial infections (Mycobacterium tuberculosis, Non-tuberculous Mycobacteria), lymphoma, as well as AIDS related disease in children with AIDS. Excellent photographs (X-ray and CT imaging) reveal the common imaging features of different diseases in different stages of treatment. Co-infections are common in the late stage of AIDS, consistent with considerable overlap of CT findings that are displayed in one single section and some of the cases in several sections. At last, there are excellent descriptions of differential diagnosis based on the same appearance (e.g. diffuse pulmonary miliary nodules, mediastinal and abdominal lymphadenopathy). Learning variety of different imaging will enrich the radiologists experience and knowledge about AIDS-related diseases, and also help clinicians making timely diagnosis and appropriate optimal treatment. It belongs in the library of each Radiologist, HIV expert and all of who care about Infectious Diseases.
