Nonoral Feeding Options; Criteria for Recommendation of Tube Feeding; Nasogastric Tube Feeding Percutaneous Endoscopic Gastrostomy Tube and Jejunostomy Tube Feeding

Sommario/riassunto

This book introduces background information and procedural overviews needed to assess swallowing disorders in adults in addition to offering detailed protocols for administering the assessment. The majority of protocols in this book are provided in both English and Spanish, allowing clinicians to effectively and efficiently assess swallowing disorders in a wide variety of patients, including those speaking Spanish.
