Titolo	Liquid Biopsy in Cancer Patients [[electronic resource] ] : The Hand Lens for Tumor Evolution // edited by Antonio Russo, Antonio Giordano, Christian Rolfo
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Humana , 2017
ISBN	3-319-55661-4
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XI, 214 p. 41 illus., 40 illus. in color.)
Collana	Current Clinical Pathology, , 2197-781X
Disciplina	616.994075
Soggetti	Pathology Oncology Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Introduction -- Precision Medicine: Are We There? -- Clonal Cancer Evolution and Intra-tumor Heterogeneity -- Tissue vs. Liquid Biopsy: Opposite or Complementary? -- Technical Aspects for the Evaluation of Circulating Tumor Cells (CTCs) -- Technical Aspects for the Evaluation of Circulating Nucleic Acids (CNA): Circulating Tumor DNA (ctDNA) and Circulating MicroRNAs -- Technical Aspects for the Evaluation of Exosome and their Content -- Liquid Biopsy in Breast Cancer -- Liquid Biopsy in Head and Neck Cancers -- Liquid Biopsy in NSCLC -- Liquid Biopsy in Gastric Cancer -- Liquid Biopsy in Pancreatic Cancer -- Liquid Biopsy in HCC -- Liquid Biopsy in CRC -- Liquid Biopsy in GIST -- Liquid Biopsy in Kidney Cancer -- Liquid Biopsy in Melanoma.
Sommario/riassunto	This text is designed to provide readers with a useful and comprehensive resource and state-of-the-art overview about the new, growing and fast-expanding field of "liquid biopsy" for the management of cancer patients. The liquid biopsy represents an important turning point in oncology since it provides a tool for a serial monitoring of disease. Liquid biopsy is our "hand lens" to follow molecular changes that characterize tumor development and progression. The book provide a unique and valuable resource on the

clinical relevance of liquid biopsy as well as on the technical aspects of liquid biopsy analysis. All invited authors are recognized experts in their field. Liquid Biopsy in Cancer Patients: The Hand Lens for Tumor Evolution is targeted to resident and fellows physicians, medical oncologists, molecular biologists and biotechnologists.

## Sommario/riassunto

"Ecocriticism is the study of literature and the environment from an interdisciplinary point of view, coming together to analyze the environment and determine possible solutions for the correction of the contemporary environmental situation. The discipline was heralded by publication of *The Ecocriticism Reader* (U Georgia, 1996) and Lawrence Buell's *The Environmental Imagination* (Harvard, 1995). Recently, all kinds of "texts" have been subjected to ecocritical methods (film, TV, scientific narrative, and architecture as well as nature writing and Romantic poetry) and questions about place (see our *Getting Back into Place*, 2nd ed., 2009), materialism (agency, process, and relationship), grounding in the natural sciences, and philosophical precision have defined the movement. This edited volume aims to bring ecocriticism closer to the material turn. The essays collected here focus on material entanglements, the agency of things, processes, and making meaning out of matter and things. It is an effective and broad-ranging reflection on contemporary human experience and human expression about the world to which we are intimately connected. Both Lovino and Opperman are well known as ecocritical theorists. They have collected essays from many of the stars in the discipline and this volume should set a new benchmark for the field"--

Dakota Carter, Siddarth Puri, Rebecca Radue, Daniel D. Sewell -- Rural elderly / Rebecca Radue, Susan K. Schultz -- The seventh age : centenarians / Raya Elfadel Kheirbek, Yasmin Banaei -- Cultural competency and

Sommario/riassunto

The term culture is multifaceted and may refer to one's belief system, values, religion, race, socioeconomic status, ethnicity, language, sexual orientation, geographic location, educational level, age, occupational risks and exposures, and gender. The authors of the book examine mental health care through these lenses, teaching the reader about implicit biases and potential miscommunication and offering strategies for overcoming these difficulties. The editor, who has worked in leadership positions overseeing veterans' mental health services, has assembled an impressive and diverse roster of contributors, each with specific expertise in his or her assigned subject. The ways in which cultural competency interacts with the six Accreditation Council for Graduate Medical Education core competencies are explored in detail. For example, in terms of patient care, cultural competency plays an important role in gathering subjective data about a patient that may ultimately impact outcomes. Teaching methods to increase cultural sensitivity and build skills in this area are highlighted, as are training modalities and clinician evaluation. The effects of migration and acculturation on mental health are examined, providing clinicians with several theoretical frameworks for understanding the migratory experience in older adults and exploring psychosocial factors associated with psychological risk in aging immigrants. Linguistic competence, defined broadly as effective communication with individuals speaking a nondominant language, is an essential component of culturally competent health care and is of particular importance in mental health care. Accordingly, the authors analyze linguistic competency in both administrative and clinical encounters and present strategies for achieving mastery in this critically important area. The text provides an abundance of tables and pedagogical features designed to enhance comprehension, including learning objectives, key points, and study questions. -- Publisher
