

1. Record Nr.	UNINA990001099400403321
Autore	Haken, Hermann
Titolo	Advanced synergetics : Instability Hierarchies of Self-Organizing Systems and Devices / Hermann Haken
Pubbl/distr/stampa	Berlin [etc.] : Springer-Verlag, 1983
ISBN	3-540-12162-5
Collana	Springer series in synergetics ; 20
Disciplina	530.13
Locazione	FI1
Collocazione	21-123.001F
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910460954903321
Autore	Mizrahi Eli M.
Titolo	Atlas of neonatal electroencephalography / / Eli M. Mizrahi, Richard A. Hrachovy
Pubbl/distr/stampa	New York, New York : , : Springer Publishing Company, , 2016 ©2016
ISBN	1-61705-234-5
Edizione	[4th ed.]
Descrizione fisica	1 online resource (322 p.)
Disciplina	618.92/8047547
Soggetti	Newborn infants - Diseases - Diagnosis Electroencephalography Pediatric neurology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.

**Nota di bibliografia**

Includes bibliographical references and index.

**Nota di contenuto**

Cover; Title; Copyright; Contents; Preface; Acknowledgments; Share  
Atlas of Neonatal Electroencephalography: Fourth Edition; Chapter 1:  
Approach to Visual Analysis and Interpretation; Terminology Related to  
Age-Dependent Developmental Features; The Process of Visual  
Analysis; The Clinical Impression; What Is the CA?; Is There Evidence of  
Focal Brain Dysfunction?; Is There Evidence of Diffuse Brain  
Dysfunction?; When Did the Brain Insult Occur?; Are There Clinical or  
Electrical Seizures?; What Is the Prognosis?; Is There an Indication That  
a Specific Disease Entity Is Present?  
Chapter 2: Techniques of RecordingGeneral Principles; Personnel; Data  
Collection; Infant Preparation; Electrode Placement; Polygraphic  
Parameters; Electrooculogram; Electromyogram; Electrocardiogram;  
Respiration; Specialized Polygraphic Measures; Montage Selection;  
Instrument Settings; Video; Nursery Environment; Infant Positioning;  
Camera Mount; Lighting; Potential for Missed Events; Recording  
Protocols; Prolonged EEG-Video Monitoring; Chapter 3: Artifacts;  
Environment; Recording Instrumentation-Patient Interface; Recording  
Instrumentation; Noncerebral Physiologic Potentials  
Alterations in Electrical Properties of Scalp or SkullVital Signs  
Monitoring; Movements; List of Figures; Environmental Interference;  
Alternations of Electrode Impedance; Potentials Induced by Movements;  
Endogenous Noncerebral Potentials; Chapter 4: Elements of the Normal  
Neonatal EEG; Continuum of Development; Continuity; Bilateral  
Synchrony; EEG Developmental Landmarks; Beta-Delta Complexes;  
Temporal Theta and Alpha Bursts; Frontal Sharp Waves; Distinguishing  
Between the Waking and Sleep EEG; Reactivity to Stimulation; Additional  
Special Waveforms and Patterns; Bifrontal Delta Activity  
Temporal Sharp WavesSummary of Conceptional Age-Dependent  
Findings; 24 to 26 Weeks Conceptional Age (Figures 4.4 and 4.5); 27 to  
28 Weeks Conceptional Age (Figures 4.6-4.8); 29 to 30 Weeks  
Conceptional Age (Figures 4.9-4.12); 31 to 33 Weeks Conceptional Age  
(Figures 4.13-4.18); 34 to 35 Weeks Conceptional Age (Figures 4.19-  
4.22); 36 to 37 Weeks Conceptional Age (Figures 4.23 and 4.24); 38 to  
40 Weeks Conceptional Age (Figures 4.25-4.37); 41 to 44 Weeks  
Conceptional Age (Figure 4.38); List of Figures; Age-Dependent  
Evolution; 24 to 26 Weeks Conceptional Age; 27 to 28 Weeks  
Conceptional Age  
29 to 30 Weeks Conceptional Age30 to 32 Weeks Conceptional Age; 33  
Weeks Conceptional Age; 34 to 35 Weeks Conceptional Age; 36 to 37  
Weeks Conceptional Age; 38 to 40 Weeks Conceptional Age; 41 to 44  
Weeks Conceptional Age; 45 to 48 Weeks Conceptional Age; Chapter 5:  
Patterns of Uncertain Diagnostic Significance; Focal Sharp Waves;  
Amplitude and Duration; Incidence and Persistence; Morphology and  
Complexity of Waveforms; Polarity; Features Associated With Changes  
in Wake/Sleep States; Focal Rhythmic Activity; Midline Frontal Rhythmic  
Activity; Midline Central Rhythmic Activity  
Occipital Rhythmic Theta Activity
