The past tense construction -- Chapter 7. Bare noun constructions -- Chapter 8. The Merger Construction: a model of construction convergence -- Chapter 9. Concluding remarks -- References -- Index
Sommario/riassunto	This volume provides a much-needed, critical overview of the field of constructions and construction grammar in the context of Singapore

English, and poses the question of identifying a construction in contact when the lexicon is derived from one language and the syntax from another. Case studies are illustrated in which the possibility of a 'merger'-construction is offered to resolve such problems. The book is intended for students of construction theories, variation studies, or any researcher of contact grammars
