                       strategies of Chinese Internet start-ups

   Sommario/riassunto It is believed that transitional economies represent a very unique
                       research context. There are abundant opportunities for
                       entrepreneurship studies facing the transitional economies. This issue
                       tries to make explorations in such aspect. The six manuscripts in this
                       issue cover three topics: relationship within the context of
                       entrepreneurship, entrepreneurship in history, and entrepreneurship in
                       specific industries. With deep quality and quantity study, they show
                       some interesting conclusions about strategy, organizational behavior,
