Alvord Falls Screening Test""; ""Index""
Sommario/riassunto	Among seniors, falls are the underlying cause of a large proportion of fatal traumatic brain injuries. On the positive side, much can be done to prevent injury from falls in the aging population. This book is an ideal guide for clinicians who see patients at risk for falling. It provides complete assessment and treatment plans, incorporating the most recent developments of new balance test equipment and techniques for balance function rehabilitation. The detailed section on assessment covers vestibular, cardiovascular, neurological, rheumatology, metabolic, orthopedic, psychological, cognitive
