The Legacy of the Community College: A Limited Opportunity Institutional Reform? Three Principles for Policy Makers; NOTES; SELECTED BIBLIOGRAPHY; ABOUT THE AUTHOR; INDEX;

**Sommario/riassunto**

Community colleges hold immense promise if they can overcome their historical legacy and be re-institutionalized with unified missions, clear goals of educational success, and adequate financial resources. This book presents the history in all its complexity so that policy makers and practitioners might better understand the constraints of the past in an effort to realize the possibilities of the future.

## Sommario/riassunto

As bone marrow transplant treatments and chemotherapy develop, the population of neutropenic cancer patients is on the rise. These developments are allowing patients to live longer, but in recent years, they have also led to an increase in previously rare infections and syndromes, whose management is unfamiliar to the average healthcare professional. Infections in Neutropenic Cancer Patients is a crucial resource for medical students, residents, practitioners, health professionals, and researchers. It details the clinical presentation, diagnoses, and management of an array of common infections and syndromes specific to neutropenic cancer patients, including real scenarios accompanied by color photos and radiographic results. Chapters include step-by-step tutorials, access to clinical answers on diagnosis and treatment, and a tabulated summary of the key points.
