Sommario/riassunto	Seventy percent of our planet is covered by water, and even in today's world of instant communication the global community is still heavily reliant on sea-based transport. The maritime domain has always been one of NATO's key strengths, but concerns about maritime security have taken on renewed importance in recent years, and NATO has been forced to re-examine some of its fundamental assumptions about the

post Cold War security environment. This book shares some of the research, debates and findings from a NATO Advanced Research Workshop (ARW); Building Trust to Enhance Maritime Security, held
