	Nota di contenuto	Crime and punishment : in the beginning -- The rise of legal traditions -- Crime in a changing landscape : from feudalism to the city and the state -- The transformation of punishment and the rise of the penitentiary -- Highwaymen, bandits, brigands and bushrangers : bands of thieves and early organized criminality -- Prohibitions, pirates, slave traders, drug smugglers and the internationalization of criminality -- The face of modern murder -- Crime and punishment in a post-colonial world -- Crime and punishment in the twenty-first century.
	Sommario/riassunto	From "an eye for an eye" to debates over capital punishment, humanity has a long and controversial relationship with doling out justice for criminal acts. Today, crime and punishment remain significant parts of our culture, but societies vary greatly on what is considered criminal and how it should be punished. In this global survey of crime and punishment throughout history, Mitchel P. Roth examines how and why we penalize certain activities, and he scrutinizes the effectiveness of such efforts in both punishing wrongdoers and bringing a sense of justice to victims.

Nota di contenuto	Introduction -- State of the art/science -- State of the practice -- Closing the gap -- Discussion.
Sommario/riassunto	Too often, however, companies lack detailed processes for finding and consulting with experts—making it hard to match the required know-how with the project at hand. In Expert Judgment in Project Management: Narrowing the Theory-Practice Gap, Paul S. Szwed provides research that will help project managers become more adept at using expert judgment effectively. The author explores the use of expertise in several sectors, including engineering, environmental management, medicine, political science, and space exploration. He then looks at the informal state of expert judgment and its underutilization in the management of projects. Szwed's critical recommendations can help project managers improve the way they select, train, and work with experts to increase the odds of any project's success.
