Sommario/riassunto	Chronic pain is a very common problem, impacting on many patients. Assessment and management can be challenging. The ABC of Pain focuses on the pain management issues often encountered in primary care. Covering major chronic pain presentations, such as musculoskeletal pain, low back pain and neuropathic pain, the ABC of

Pain also provides guidance on the management of pain in pregnancy, children, older adults, drug dependency and the terminally ill. Beginning with an overview of the epidemiology of chronic pain, pain mechanisms and the assessment of pain, it then provides pract
