Sommario/riassunto	This unique book intends to provide a focused analysis of the main Chinese industrial sectors through case studies, data analysis and

review of new state-initiated policies. In response to the global economic crisis in the short run and to cope with the existing structural problems of production in the long run, the Chinese central government has successively released new development outlines for 10 key industries since 2008. In this book, the authors will use key sectors including automobile, steel, shipbuilding, high-speed railway and new energy, to analyze the development of China's industr
