Sommario/riassunto	The book examines six long narratives of the Fourth Gospel, arguing that they are best understood as 'symbolic narrative'. They display a unique cohesion of symbol and narrative: the narrative unfolds the symbol and the symbol draws out the narrative. This process occurs as the character struggles to understand the symbolic meaning. The structure develops in five Stages: the establishing of a 'sign', image or feast (Stage 1); misunderstood in materialistic terms (Stage 2); the struggle to understand the symbolic meaning (Stage 3); the acceptance or rejection of that meaning (Stage 4); a confes

Nota di contenuto	Models for the memory -- Descriptions of the neuropsychology of memory -- Elementary memory design -- The arts of memory -- Memory and the ethics of reading -- Memory and authority -- Memory and the book.
Sommario/riassunto	Mary Carruthers's classic study of the training and uses of memory for a variety of purposes in European cultures during the Middle Ages has fundamentally changed the way scholars understand medieval culture. This fully revised and updated second edition considers afresh all the material and conclusions of the first. While responding to new directions in research inspired by the original, this new edition devotes much more attention to the role of trained memory in composition, whether of literature, music, architecture, or manuscript books. The new edition will reignite the debate on memory in medieval studies and, like the first, will be essential reading for scholars of history,

music, the arts and literature, as well as those interested in issues of orality and literacy (anthropology), in the working and design of memory (both neuropsychology and artificial memory), and in the disciplines of meditation (religion).
