Nota di contenuto	section 1. Introduction and basic issues -- section 2. Cognitive and affective influences of conflict and aggression -- section 3. Conflict and aggression in relationships -- section 4. Social, cultural, and evolutionary factors in social conflict and aggression.
Sommario/riassunto	This book provides an up-to-date integration of some of the most recent developments in social psychological research on social conflict and aggression, one of the most perennial and puzzling topics in all of psychology. It offers an informative, scholarly yet readable overview of recent advances in research on the nature, antecedents, management, and consequences of interpersonal and intergroup conflict and aggression. The chapters share a broad integrative orientation, and argue that human conflict is best understood through the careful analysis of the cognitive, affective, and motivation
