Autore	Fayek Ahmed
Titolo	The Clinical Application of the Theory of Psychoanalysis // by Ahmed Fayek
Pubbl/distr/stampa	Boca Raton, FL : , : Routledge, , [2018] ©2011
ISBN	0-429-90607-2 0-429-48130-6 1-283-24962-6 9786613249623 1-84940-922-6
Edizione	[First edition.]
Descrizione fisica	1 online resource (313 p.)
Disciplina	150.19/5 616.8917
Soggetti	Psychoanalysis Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Problematiques -- pt. 2. Clinical -- pt. 3. Theory.
Sommario/riassunto	<p>Psychoanalysis - the one that we are familiar with - started in the clinical field. Freud and Breuer made some strides in the treatment of hysteria using hypnosis. They put together a theory of psychopathology based on two basic notions: conflicts between acceptable and unacceptable impulses (ideas, desires, fantasies, etc.), and the repression of the unacceptable impulses causing the formation of symptoms. Under hypnosis, the patients were given the chance to abreact the repressed, and the therapeutic endeavour was to allow catharsis, hence the origin of the term "catharsis theory" regarding this phase of hypnosis. However, the real breakthrough in psychoanalysis came to Freud in intuitions about matters from outside the field of pathology and the clinic, and without the help of hypnosis. They came from ordinary, even banal, phenomena like dreams, slips of the tongue, and jokes. In this book, the author covers the difference between a</p>

modified theory of catharsis and a theory of psychoanalysis, as well as the importance of psychodynamic diagnosis in the practice of psychoanalysis.

Sommario/riassunto

This book constitutes the thoroughly refereed joint post-workshop proceedings of the 4th International Workshop on Mining Ubiquitous and Social Environments, MUSE 2013, held in Prague, Czech Republic, in September 2013, and the 4th International Workshop on Modeling Social Media, MSM 2013, held in Paris, France, in May 2013. The 8 full papers included in the book are revised and significantly extended versions of papers submitted to the workshops. The focus is on collective intelligence in ubiquitous and social environments. Issues tackled include personalization in social streams, recommendations exploiting social and ubiquitous data, and efficient information processing in social systems. Furthermore, this book presents work dealing with the problem of mining patterns from ubiquitous social data, including mobility mining and exploratory methods for ubiquitous data analysis.
