Sommario/riassunto

The years from 1918 to 1945 remain central to European History. It was a breath-taking time during which the very best and very worst attributes of Mankind were on display. In the euphoria of peace which followed the end of the First World War, the Baltic States emerged as independent forces on the world stage, participating in thrilling experiments in national and transnational governance. Later, following economic collapse and in the face of rising totalitarianism among even Europe's most cultured nations, Baltic communities succumbed to nationalism too. During wartime, Baltic peoples became both victims and, sometimes, victimisers. Ultimately their victimhood lasted until the end of the Cold War, yielding consequences still discernible at the start of the twenty first century. Taking the period 1918 to 1945 as pivotal, this collection of essays examines some of the key themes in Baltic History as they are emerging today. These include appreciations of identity, autonomy and the rights of national minorities; the everyday and social foundations of international security; and the importance of historical memory to popular and political identities.

Soggetti

Number theory -- Algebraic number theory: local and p-adic fields -- Non-Archimedean dynamical systems
Functional analysis
p-adic analysis
Dynamical systems and ergodic theory -- Arithmetic and non-Archimedean dynamical systems -- Polynomial and rational maps
Field theory and polynomials -- Topological fields -- Non-Archimedean valued fields
Field theory and polynomials -- Topological fields -- Valued fields
Functional analysis -- Other (nonclassical) types of functional analysis -- Functional analysis over fields other than $\{\mathbf{R}\}$ or $\{\mathbf{C}\}$ or the quaternions; non-Archimedean functional analysis
Functional analysis -- Topological linear spaces and related structures -- Summability and bases
Functions of a complex variable -- Entire and meromorphic functions, and related topics -- Distribution of values, Nevanlinna theory
Sequences, series, summability -- Convergence and divergence of infinite limiting processes -- Convergence and divergence of series and sequences of functions
Order, lattices, ordered algebraic structures -- Ordered structures -- None of the above, but in this section
Operator theory -- General theory of linear operators -- (Semi-) Fredholm operators; index theories
