

1. Record Nr.	UNINA9910461414903321
Autore	Silverman Chloe
Titolo	Understanding autism [[electronic resource]] : parents, doctors, and the history of a disorder // Chloe Silverman
Pubbl/distr/stampa	Princeton, NJ ; ; Woodstock, : Princeton University Press, 2011
ISBN	1-283-29070-7 9786613290700 1-4008-4039-2
Edizione	[Course Book]
Descrizione fisica	1 online resource (353 p.)
Disciplina	618.9285882
Soggetti	Autism in children Parents of autistic children Autistic children - Family relationships Autism in children - Treatment Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- Acknowledgments -- Introduction. Love as an Analytic Tool -- Part One -- 1. Research Programs, "Autistic Disturbances," and Human Difference -- 2. Love Is Not Enough: Bruno Bettelheim, Infantile Autism, and Psychoanalytic Childhoods -- 3. Expert Amateurs: Raising and Treating Children with Autism -- Interlude. Parents Speak: The Art of Love and the Ethics of Care -- Part two -- 4. Brains, Pedigrees, and Promises: Lessons from the Politics of Autism Genetics -- 5. Desperate and Rational: Parents and Professionals in Autism Research -- 6. Pandora's Box: Immunizations, Parental Obligations, and Toxic Facts -- Conclusion. What the World Needs Now: Learning About and Acting on Autism Research -- Notes -- Bibliography -- Index
Sommario/riassunto	Autism has attracted a great deal of attention in recent years, thanks to dramatically increasing rates of diagnosis, extensive organizational mobilization, journalistic coverage, biomedical research, and clinical innovation. Understanding Autism, a social history of the expanding diagnostic category of this contested illness, takes a close look at the

role of emotion--specifically, of parental love--in the intense and passionate work of biomedical communities investigating autism. Chloe Silverman tracks developments in autism theory and practice over the past half-century and shows how an understanding of autism has been constituted and stabilized through vital efforts of schools, gene banks, professional associations, government committees, parent networks, and treatment conferences. She examines the love and labor of parents, who play a role in developing--in conjunction with medical experts--new forms of treatment and therapy for their children. While biomedical knowledge is dispersed through an emotionally neutral, technical language that separates experts from laypeople, parental advocacy and activism call these distinctions into question. Silverman reveals how parental care has been a constant driver in the volatile field of autism research and treatment, and has served as an inspiration for scientific change. Recognizing the importance of parental knowledge and observations in treating autism, this book reveals that effective responses to the disorder demonstrate the mutual interdependence of love and science.
