

1. Record Nr.	UNINA9910461420903321
Autore	Vachek Josef
Titolo	Written language revisited [[electronic resource] /] / Josef Vachek ; selected, edited, and introduced by Philip A. Luelsdorff
Pubbl/distr/stampa	Amsterdam, : J. Benjamins Pub. Co., 1989
ISBN	1-280-49743-2 9786613592668 90-272-7410-X
Descrizione fisica	1 online resource (235 p.)
Altri autori (Persone)	LuelsdorffPhilip
Disciplina	001.54/3
Soggetti	Written communication Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	WRITTEN LANGUAGE REVISITED; Title page; Copyright page; Table of contents; Acknowledgments; Introduction; Note; Some remarks on writing and phonetic transcription; Notes; Written language and printed language; Notes; On the linguistic status of written utterances; Notes; The primacy of writing?; Notes; Segmentation of the flow of speech and written language; References; Some remarks on the stylistics of written language; References; Glossematics and written language; References; Paralinguistic sounds, written language and language development; Notes; References Written language as a heterogeneous systemNote; References; The 1929 Praguian ""Theses"", internal speech, and written language; References; Written language seen from the functionalist angle; 1. Increasing interest in written language; 2. The development of Praguian views of written language; 3. Correspondences between the spoken and the written norm of language; 4. Queries raised against the autonomy of the written norm and their refutation; 5. Functionalist conception of written norm providing deeper insight into facts of language; Notes; References; On the problem of written language NotesReferences; Noteson the development of the written norm of English; Notes; Some remarks on puristic tendenciesin written language; Notes; References; Remarks on redundancy in

written language with special regard to capitalization of graphemes; Notes; References; Spelling as an important linguistic concept; Notes; References; On pluridimensionality of written utterances and its consequences; Notes; References; Some remarks on revaluations of redundant graphemes; Notes; References; Thoughts on some fifty years of research in written language; References; Index of persons; Index of subjects

Sommario/riassunto

Josef Vachek, one of the last living exponents of the Prague School, has dedicated 50 years of his life to the study of written language in all its aspects. This volume is a tribute to him on the occasion of his 80th birthday. It contains a selection of his papers written between 1945 and 1987. Contents Writing and phonetic transcription; Written language and printed language; The linguistic status of written utterances; The primacy of writing?; Segmentation of the flow of speech and written language; The stylistics of written language; Glossematics and written language; Paralinguistic sounds,

Nota di bibliografia

Includes bibliographical references and index.

I. IntroductionII. Design; III. Synthesis; IV. Antiviral activity; Acknowledgements; References; Chapter 4. Synthesis and antiviral evaluation of broad spectrum, orally active analogs of cidofovir and other acyclic nucleoside phosphonates; I. Introduction; II. Synthesis of hexadecyloxypropyl and related esters of cidofovir; III. Antiviral evaluation and spectrum of activity; IV. Structure activity relationships; V. Cellular metabolism; VI. Oral pharmacokinetics and tissue distribution; VII. Antiviral activity in animal models of viral diseases VIII. Alkoxyalkyl esters of (S)-HPMPA and other acyclic nucleoside phosphonatesIX. Conclusions; Acknowledgements; References; Chapter 5. CCR5 antagonistsCCR5 antagonists for the treatment ofHIV infection and AIDS; I. Introduction; II. Inhibition of HIV entry; III. CCR5 as a drug target; IV. The discovery of novel CCR5 antagonists; V. Molecular mechanisms; VI. Resistance to CCR5 antagonists in vitro and in the clinic; VII. Conclusions; References; Chapter 6. The medicinal chemistry of the DATADATA and DAPYDAPY series of HIV-1HIV-1 non-nucleoside reverse transcriptase inhibitors (NNRTIsNNRTIs)
AbstractI. Introduction; II. The diaryltriazine (DATA) series; III. The diarylpyrimidine (DAPY) series; IV. Conclusion; Acknowledgements; References; Index

Regularly reviewing the "state-of-the-art" developments in the antiviral drug research field, this latest volume spans the conceptual design and chemical synthesis of new antiviral compounds. It discusses their structure-activity relationship, mechanism and targets of action, pharmacological behavior, antiviral activity spectrum, and therapeutic potential for clinical use.
