

1. Record Nr.	UNINA9910461421003321
Autore	Finlayson Clive <1955->
Titolo	Avian survivors : the history and biogeography of Palearctic birds // Clive Finlayson
Pubbl/distr/stampa	London : , : T. & A.D. Poyser, , 2011
ISBN	1-4725-9751-6 1-283-29421-4 9786613294210 1-4081-3732-1 1-4081-3731-3
Descrizione fisica	1 online resource (321 p.)
Collana	Poyser monographs
Disciplina	598.17
Soggetti	Birds - Ecology - Palearctic Birds - Geographical distribution Climatic changes - Environmental aspects - Palearctic Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (pages 279-288) and index.
Nota di contenuto	Cover; Contents; Preface; Acknowledgements; 1. Introducing the Tertiary; 2. The changing ecology of the Palearctic in the Pleistocene; 3. Origins of Palearctic birds; 4. Corvoidea - shrikes, crows and orioles; 5. Sylvioidea - hirundines, warblers and larks; 6. Paroidea - tits; 7. Muscicapoidea - chats, thrushes, flycatchers and allies; 8. Passeroidea - sparrows, finches, pipits and buntings; 9. Falcons; 10. Terrestrial non-passerines; 11. Owls; 12. Raptors; 13. Gulls, terns, auks and waders; 14. Divers, tubenoses, and waterbirds; 15. Cranes, rails, bustards and cuckoos 16. Nightjars and swifts 17. Pigeons, sandgrouse, tropicbirds, flamingos and grebes; 18. Geese, swans, ducks and gamebirds; 19. Climate and the history of the birds of the Palearctic; 20. Surviving climate change - characteristics of survivors; 21. The Palearctic avifauna of yesterday, today and tomorrow; Appendix 1. Species covered in this book: bioclimatic and ecological features; Appendix 2. European Pleistocene fossil birds; References; Index

Sommario/riassunto

"Using a fresh approach that classifies birds according to their bioclimatic characteristics, Clive Finlayson views the history and distribution of Palearctic birds from a radical new angle. History and chance events play a central role in a story that has its origins before the asteroid impact that finished off the dinosaurs. In this book, Finlayson shows that the avifauna of the Palearctic long predates the glaciations of the last two million years, and had established itself gradually during the turbulent times of the Miocene and Pliocene, the lifting of Tibet and the drying of the continents having a major influence on these birds. Those that made it to the start of the glaciations were equipped to deal with whatever the climate could throw at them. They were the avian survivors, and they are still here with us today. Packed with figures and with a rich colour section, Avian Survivors tells the definitive story of the birds of the Palearctic, across space and time."--Bloomsbury Publishing.
