Sommario/riassunto	This book contains the first in-depth corpus-based description of structural nativization at the lexis-grammar interface in Indian English, the largest institutionalized second-language variety of English worldwide. For a set of three ditransitive verbs give, send and offer - collocational patterns, verb-complementational preferences and correlations between collocational and verb-complementational routines are described. The present study is based on the comparison of the Indian and the British components of the International Corpus of English as well as a 100-million-wor
