

1. Record Nr.	UNINA9910461464903321
Autore	Husch Alexander
Titolo	Open innovation toolkits in der Produktentwicklung : kundenintegration als potential der wertanalyse / / Alexander Husch
Pubbl/distr/stampa	Hamburg, [Germany] : , : Diplomica Verlag, , 2015 ©2015
ISBN	3-95850-359-4 3-95850-498-1
Descrizione fisica	1 online resource (146 p.)
Disciplina	658.514
Soggetti	Technological innovations - Economic aspects Technological innovations - Management Electronic books.
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	4.2.1 Betrachtung im Fuzzy Front End4.2.2 Betrachtung in der kreativen Schaffensphase; 4.2.3 Betrachtung in der kreativen Bewertungsphase; 4.3 Risiken des Einsatzes von Open Innovation; 5 Zusammenfassung und Ausblick; 6 Abkürzungsverzeichnis; 7 Literaturverzeichnis
Sommario/riassunto	Im Fokus dieser Studie steht die Analyse und Bewertung der Einsatzmöglichkeiten IT-gestützter Open Innovation Toolkits im Rahmen der Produktentwicklung nach dem Konzept der Wertanalyse. Eine eingehende Untersuchung soll aufzeigen, inwiefern der zehnstufige Arbeitsplan durch Methoden und Werkzeuge der Open Innovation ergänzt und weiter verbessert werden kann. Dabei stellt die Untersuchung Chancen und Risiken einer möglichen Implementierung interaktiver Produktentwicklung gegenüber und bewertet diese. Das Hauptaugenmerk liegt hierbei auf den frühen Phasen des Innovationsprozesses, da die Möglich

Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Presents results of collaborative research projects of the European Community's Information Society Technologies Programme about service-oriented computing.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Foreword; Preface; 1 Introduction; 2 BIONETS; 3 Service Discovery in Pervasive Computing Environments; 4 Unified Discovery and Composition of Heterogeneous Services; 5 Compositional Service Engineering Using Semantic Interfaces; 6 Developing Self-Adaptive Mobile Applications and Services with Separation-of-Concerns; 7 Sensoria; 8 ASTRO; 9 WS-DIAMOND; 10 SeCSE-Service-centric System Engineering; 11 User-centric Service Creation and Execution; 12 INFRAWEBs; 13 Enabling Data, Information, and Process Integration with Semantic Web Services; 14 AMIGO 15 Security and Dependability in the Evolving Service-centric Architectures16 GridTrust; 17 Security-by-Contract (SDC) for Software and Services of Mobile Systems; 18 The ATHENA Framework for Cross-Organizational Business Processes; 19 Dependability in Service-Oriented Systems; 20 Consolidating Research Results; 21 S-Cube;

Service-Oriented Applications and Architectures (SOAs) have captured the interest of industry as a way to support business-to-business interaction, and the SOA market grew by \$4.9 billion in 2005. SOAs and in particular service-oriented computing (SOC) represent a promising approach in the development of adaptive distributed systems. With SOC, applications can open themselves to services offered by third parties and accessed through standard, well-defined interfaces. The binding between the applications and the services can be, in this context, extremely loose--enabling the ad hoc creation of new services when the need arises. This book offers an overview of some current research in the field, presenting the results of eighteen research projects funded by the European Community's Information Society Technologies Program (IST). The projects, collaborations between industry and academia, have produced practical, achievable results that point the way to real-world applications and future research. The chapters address such issues as requirement analysis, design, governance, interoperability, and the dependability of systems made up of components owned by third parties. The results are presented in the context of two roadmaps for research, one developed by European industry involved in software development and the other by researchers working in the service area. The contributors report first on the "Infrastructure Layer," then (in the bulk of the book) on the "Service Integration Layer," the "Semantic Layer," and finally on the issues that cut across the different layers. The book concludes by looking at ongoing research on both roadmaps.
