Soggetti	Sports - Psychological aspects Adjustment (Psychology) Athletes - Psychology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	First ed. : Nova Science, 2004.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Coping and Emotion in Sport; Copyright; Contents; List of figures and tables; List of contributors; Preface; 1 Coping processes in sport; 2 Emotion in sport: antecedents and performance consequences; 3 Coping with Trauma in Sport; 4 Measurement issues in emotion and emotion regulation; 5 Coping in sport through social support; 6 Social influence on emotion in sport; 7 Key movements in directional research in competitive anxiety; 8 Enhancing positive emotion in sport; 9 Coping and emotion in disability sport; 10 The consequences and control of emotions in elite athletes 11 The emotional response to athletic injury: re-injury anxiety 12 Losing to win: a clinical perspective on the experience of loss among elite athletes; 13 Elite athletes' experiences of coping with stress; 14 Working as a sport psychologist at two Olympic Games: a humanist approach; 15 Learning to cope in extreme environments: solo endurance ocean sailing; 16 Coping and emotion in sport: future

directions; Index

Sommario/riassunto

The emotional highs and lows of competitive sport, whether experienced as a competitor, spectator or coach may be the essential ingredient that gives sport its universal and compelling appeal. Emotion is clearly a pervasive force within competitive sport, and this is reflected in the burgeoning interest over recent decades in athletes' emotions and strategies for coping with these emotions. The interplay between emotion and coping is a critical factor in determining, through its influence on key psychological functions, an athlete's potential success in competitive sport. This fully revised

3. Record Nr.	UNINA9910789400503321
Autore	Nolan Michael
Titolo	Cram session in functional neuroanatomy : a handbook for students & clinicians // Michael F. Nolan
Pubbl/distr/stampa	Thorofare, New Jersey : , : Slack, Incorporated, , 2012 ©2012
ISBN	1-61711-420-0 1-61711-780-3
Descrizione fisica	1 online resource (224 p.)
Collana	Cram session in physical therapy series Cram session in functional neuroanatomy
Disciplina	611.8
Soggetti	Neuroanatomy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	""Cover""; ""Front""; ""Section I""; ""Section II""; ""Section III""; ""Section IV""; ""Section V""; ""Section VI""; ""Section VII""
Sommario/riassunto	"The book is intended for students in the health professions who are looking for a concise, clinically-relevant introduction to or review of human neuroanatomy. For students studying functional neuroanatomy for the first time, individual topics are covered in sufficient depth to permit and adequate understanding of the subject but not in so much detail that valuable time is lost or diverted from other studies or learning activities. Students with a previous academic or clinical background in functional neuroanatomy will find the depth of coverage quite adequate for the purpose of review. The book is organized primarily to facilitate understanding of nervous system function with specific sections dealing with sensory and motor functions, functions mediated by the cranial nerves and the so-called higher cortical functions. Additional sections are included that focus on the gross anatomical organization of the nervous system and the physical environment in which the nervous system is located. These latter sections address such topics as the blood supply and venous drainage of the brain, the multilayered meningeal coverings of the central nervous system and the carefully regulated fluid environment both within and surrounding the brain that is necessary for normal nerve cell

function"--
