Purple puzzles: the 1994 and 1998 government formations in the Netherlands and coalition theory; 9. The Belgian 'Rainbow coalition': optical illusion or mechanical phenomenon?; 10. From puzzles to prospects for coalition theory; Index |
| Sommario/riassunto | Understanding the formation of governments has always been central to political science. Traditionally this topic has been considered from a rational choice theory perspective and the empirical testing of these theories; however neither approach alone is able to explain a large proportion of actual coalition formations. This comparative volume brings together a rational choice theory perspective and the empirical testing of these theories to study government formation. It provides in-depth studies of government formations in Europe that cannot be accounted for by existing coalition t |
