Sommario/riassunto	Handwritten in the seventeenth century, the Arte de la lengua chio chiu is the oldest extant grammar of the Chinese vernacular known as Southern Min or Hokkien, and a spectacular source text for present-day linguistics. Its author, a Spanish Dominican missionary, worked among the Chinese settlers in Manila or "Sangleys". The first part of The Language of the Sangleys is an in-depth analysis of the Arte in its historical, social and linguistic contexts. The second part offers an annotated transcript and translation of the Arte , including facsimiles of the original manuscript, making this study eminently fit for classroom

use. Combining sophisticated theory and method with meticulous philology, *The Language of the Sangleys* presents a fascinating, new chapter in the history of Chinese and general linguistics.
