Sommario/riassunto	The present collection of articles grew out of a workshop on Vietnamese linguistics in 2009 at the University of Stuttgart, Germany.

To our knowledge, no workshop with a comparable scope has been held outside of Vietnam for the past 20 years, or even longer. Given the important typological status of Vietnamese as a paradigm case of an isolating language, the volume covers the most relevant fields in linguistics: syntax, semantics, phonology, and the lexicon. A guiding principle in assembling the chapters for this volume has been to take an inclusive stance as far as the commitment to different frameworks and research methodologies is concerned. All the contributors are proponents of recent developments in their individual areas of specialization. The editors have taken special care to cater for a readership which should be as broad as possible. This means that each contribution is self-contained and does not presuppose any knowledge of Vietnamese. The volume is recommended to general linguists, comparative linguists, typologists and to researchers specializing in languages of East and South East Asia.

## Sommario/riassunto

In 2004, Senators Grassley and Baucus requested that Independent Sector, the major trade organization for nonprofits in the US, convene a panel to recommend actions to strengthen nonprofit governance and ethical standards. They expressed concern that current laws and guidelines failed to hold tax-exempt organizations accountable. After embarking upon an industry collaborative, Independent Sector's advisory panel issued a report in October 2007, highlighting 33 principles it recommended nonprofits adopt. The report was overwhelmingly welcomed by the nonprofit sector, but the daunting challenge of implementing these principles remains. Advancing Nonprofit Stewardship Through Self-Regulation points the way forward for nonprofits by identifying specific strategies for implementing Independent Sector's principles. It also urges other researchers and practitioners to create competing strategies of implementation to give nonprofits choice. This lucid and brief guidebook shows how organizations can navigate demands for increased accountability and transparency through constructing and executing improved bylaws while creating a setting of integrity and trust. It is essential reading not only for all US nonprofits but for NGOs facing similar challenges around the world.
