Sommario/riassunto	This book offers a clear-eyed and balanced analysis of for-profit colleges and universities, reviewing their history, business strategies, and management practices; setting them in the context of marketplace conditions, the framework of public policy and government regulations; and viewing them in the light of the public good. Individual chapters

variously explore FPCU's governance, how they develop courses and programs, and the way they define faculty work; present findings from in-depth interviews with parttime and full-time faculty to understand how external forces and the imperative of pro

Nota di contenuto	From geodata to geographic knowledge -- Knowledge representation -- Towards geographic knowledge systems -- Geographic objects -- Geographic relations -- Geographic ontologies -- Complex geographic objects and structures -- Gazetteers and multilingualism -- Geographic knowledge discovery and data mining -- Geographic applicative rules -- Geovisualization and chores - GKS: querying and interoperability -- Conclusion: knowledge as infrastructure for smart governance.
Sommario/riassunto	This book studies the specific nature of geographic knowledge and the structure of geographic knowledge bases. Geographic relations, ontologies, gazetteers and rules are detailed as the basic components of such bases, and these rules are defined to develop our understanding of the mechanisms of geographic reasoning. The book examines various problems linked to geovisualization, chores, visual

querying and interoperability to shape knowledge infrastructure for smart governance.
