DiLorenzo Student Self-Reliance Project: Embarking on a Lifelong Pursuit of Knowledge?; Copyright
Sommario/riassunto	<DIV><DIV>Paul Heyne, one of the nation's best-selling economists, provides an accessible overview of the discipline of economics. Economic knowledge, he contends, is not complete without reference to the totality of human society-a realization essential to a proper understanding of the fundamental principles of economics. The sweep of economic thinking is presented here with reference to the great economists and important schools of thought.</DIV></DIV>

Scanlon -- Energy resources and the environment : a chapter on applied science / John H. Shaw -- Interracial literature / Werner Sollors -- "Pursuits of happiness" : dark threads in the history of the American revolution / Laurel Thatcher Ulrich.
Sommario/riassunto	From Harvard University, one of the world's preeminent institutions of liberal education, comes a collection of essays sampling topics at the forefront of academia in the twenty-first century. Written by faculty members at the cutting edge of their fields, including such luminaries

as Steven Pinker, Laurel Thatcher Ulrich, and Harry R. Lewis, these essays offer a clear and accessible overview of disciplines that are shaping the culture, and even the world. The authors, among the most respected members of Harvard's faculty, invite readers to explore subjects as diverse as religious literacy and Islam, liberty and security in cyberspace, medical science and epidemiology, energy resources, evolution, morality, human rights, global history, the dark side of the American Revolution, American literature and the environment, interracial literature, and the human mind. They summarize key developments in their fields in ways that will both entertain and edify those who seek an education beyond the confines of the classroom. It is sometimes said that youth is wasted on the young. It could also be said that college, too often, is wasted on college students-that only after graduating does a former student come to appreciate learning. To those wishing to revisit the college classroom-as well as to those who never had the opportunity in the first place-this book gives a taste of the modern course at Harvard. The essays are stimulating and informative, and the annotated bibliographies accompanying each chapter provide invaluable guidance to the life-long learner who wants to pursue these fascinating topics in depth.
