Sommario/riassunto	New York, Chicago, and Los Angeles have long been shaped by immigration. These gateway cities have traditionally been assumed to be the major flashpoints in American debates over immigration policy- but the reality on the ground is proving different. Since the 1980's, new immigrants have increasingly settled in rural and suburban areas, particularly within the South. Couple this demographic change with an increase in unauthorized immigrants, and the rural South, once perhaps the most culturally and racially ""settled"" part of the country, now offers a window into the changing dynamics of...

Sommario/riassunto	This paper runs the gamut of qualitative and quantitative analyses to examine the performance of French banks during 2006-2008 and the financial support measures taken by the French government. French banks were not immune but proved relatively resilient to the global financial crisis reflecting their business and supervision features. An event study of the impact of government measures on CDS, debt, and equity markets points to the reduction of credit risk and financing cost as well as the redistribution of resources. With the crisis still unfolding, uncertainties remain and challenges lie ahead, calling for continued vigilance and enhanced risk management.
