|-------------------------|--|
| 1. Record Nr. | UNINA9910461592903321 |
| Autore | Georgii Hans-Otto |
| Titolo | Gibbs measures and phase transitions [[electronic resource] /] / Hans-Otto Georgii |
| Pubbl/distr/stampa | Berlin ; ; New York, : De Gruyter, c2011 |
| ISBN | 1-283-16636-4 9786613166364 3-11-025032-2 |
| Edizione | [2nd ed.] |
| Descrizione fisica | 1 online resource (560 p.) |
| Collana | De Gruyter studies in mathematics, , 0179-0986 ; ; 9 |
| Classificazione | SK 800 |
| Disciplina | 515/.42 |
| Soggetti | Probabilities Phase transformations (Statistical physics) Measure theory Electronic books. |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | pt. 1. General theory and basic examples -- pt. 2. Markov chains and Gauss fields as Gibbs measures -- pt. 3. Shift-invariant Gibbs measures -- pt. 4. Phase transitions in reflection positive models. |
| Sommario/riassunto | <![CDATA[From a review of the first edition: ""This book [...] covers in depth a broad range of topics in the mathematical theory of phase transition in statistical mechanics. [...] It is in fact one of the author's stated aims that this comprehensive monograph should serve both as an introductory text and as a reference for the expert." (F. Papangelou, Zentralblatt MATH) The second edition has been extended by a new section on large deviations and some comments on the more recent developments in the area.]]> |
