Sommario/riassunto	Authored by an experienced agriculturalist with substantial field experience in developing countries, this book adds to the literature on food security by proposing practical measures for improving plant-

based food security in Asia and Sub-Saharan Africa. Covering issues affecting food security, this book discusses ways of measuring farmers' resources, strategies for action, and an analysis of the challenges and problems faced, concluding with a discussion of ways in which stakeholders could work better together. This title is suitable for policy makers, international development agencies, NGO
