Sommario/riassunto	Shamanism can be described as a group of techniques by which its practitioners enter the "spirit world," purportedly obtaining information that is used to help and to heal members of their social group. Despite a resurgence of interest in shamanism and shamanic states of

consciousness, these phenomena are neither well-defined nor sufficiently understood. This multi-disciplinary study draws on the fields of psychology, philosophy and anthropology with the aim of demystifying shamanism. The au...
