Sommario/riassunto	Most social science studies of local organizations tend to focus on "civil society" associations, voluntary associations independent from state control, whereas government-sponsored organizations tend to be theorized in totalitarian terms as "mass organizations" or manifestations of state corporatism. Roots of the State examines neighborhood associations in Beijing and Taipei that occupy a unique space that exists between these concepts. Benjamin L. Read views the work of the neighborhood associations he studies as a form of "administrative grassroots engagement."
