Sommario/riassunto

Eye Movement Desensitization and Reprocessing (EMDR), along with methods from the new field of energy psychology, such as the Emotional Freedom Techniques (EFT), enable the rapid processing and release of traumatic memories and painful emotion. In this innovative work, Phil Mollon demonstrates how the perspectives of EMDR, energy psychology, and psychoanalysis can inform and enrich each other. By summarising relevant research and providing many clinical examples, Mollon has produced a challenging and invigorating scrutiny of psychoanalysis and an expanded vision of the potential for psychosomatic healing.
