   Note generali   Description based upon print version of record.

   Nota di bibliografia Includes bibliographical references and indexes.

   Nota di contenuto   pt. 1. Exploiting the web as a corpus : methods and tools -- pt. 2.
                         Corpus-based case studies.

   Sommario/riassunto   This book describes new methodological and technological approaches
                         to corpus building and presents recent research based on the
                         Norwegian Newspaper Corpus. This is a large monitor corpus of
                         contemporary Norwegian language, compiled through daily harvesting
                         of web newspapers. The book gives an overview of the corpus and its
                         system architecture, and presents tools used for tasks such as text
                         harvesting, annotation, topic classification and extraction and
                         frequency profiling of new words and phrases. Among the innovative
                         technologies is Corpuscle, a corpus query engine and management
                         system which
