Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface; Introduction: Queering the Uncanny; Secrets and their Disclosure; Queer Spectrality; Place and Space; Monstrous Others; Notes; Bibliography; Index
Sommario/riassunto	The Queer Uncanny: New Perspectives on the Gothic investigates the diverse roles that the uncanny, as defined by Sigmund Freud, Helene Cixous and other theorists, plays in representing lesbian and male gay sexualities and transgender in a selection of contemporary British, American and Caribbean fiction published 1980-2007. Novels by Christopher Bram, Alan Hollinghurst, Randall Kenan, Shani Mootoo, James Purdy, Sarah Schulman, Ali Smith, Sarah Waters, Jeanette Winterson and other writers are discussed in the context of queer theory and gothic critical writing. The notion of the uncanny as '

Sommario/riassunto

This volume presents the proceedings of the 11th International Conference on the Design of Cooperative Systems (COOP 2014). The conference is a venue for multidisciplinary research contributing to the design, assessment and analysis of cooperative systems and their integration in organizations, public venues, and everyday life. COOP emerged from the European tradition of Computer Supported Cooperative Work (CSCW) and Cognitive Ergonomics as practiced in France. These proceedings are a collection of 28 papers reflecting the variety of research activities in the field, as well as an increasing interest in investigating the use and design of ICT in all aspects of everyday life and society, and not merely in the workplace. The papers represent a variety of research topics, from healthcare to sustainable mobility to disaster response, in settings from all over the world. For the first time, the proceedings include papers presented in an Early-Career Researchers Track which was organized in order to give young researchers the opportunity to discuss their work with an international community. This collection of papers provides a picture of new developments and classic topics of research around cooperative systems, based on the principle that a deep knowledge of cooperative practices is a key to understanding technology impacts and producing quality designs. The articles presented will appeal to researchers and practitioners alike, as they combine an understanding of the nature of work with the possibilities offered by novel digital technologies. .
