**Sommario/riassunto**

What does doing comparative law involve? Too often, explicit methodological discussions in comparative law remain limited to the level of pure theory, neglecting to test out critiques and recommendations on concrete issues. This book bridges this gap between theory and practice in comparative legal studies. Essays by both established and younger comparative lawyers reflect on the methodological challenges arising in their own work and in work in their area. Taken together, they offer clear recommendations for, and critical reflection on, a wide range of innovative comparative research projects.

| Sommario/riassunto      | This book outlines the creative process of making environmental management decisions using the approach called Structured Decision Making. It is a short introductory guide to this popular form of decision making and is aimed at environmental managers and scientists. This is a distinctly pragmatic label given to ways for helping individuals and groups think through tough multidimensional choices characterized by uncertain science, diverse stakeholders, and difficult tradeoffs. This is the everyday reality of environmental management, yet many important decisions currently are made on an ad hoc |
