

1. Record Nr.	UNINA9910461779703321
Titolo	Encapsulation technologies and delivery systems for food ingredients and nutraceuticals [[electronic resource] /] / edited by Nissim Garti and D. Julian McClements
Pubbl/distr/stampa	Philadelphia, Pa., : Woodhead Pub., 2012
ISBN	0-85709-590-0
Descrizione fisica	1 online resource (639 p.)
Collana	Woodhead Publishing series in food science, technology and nutrition, , 2042-8049 ; ; no. 239
Altri autori (Persone)	GartiNissim McClementsD. Julian
Disciplina	664.024
Soggetti	Functional foods Microencapsulation Food - Biotechnology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Requirements for food ingredient and nutraceutical delivery systems -- pt. 2. Processing technology approaches to produce encapsulation and delivery systems -- pt. 3. Pysiochemical approaches to produce encapsulation and delivery systems -- pt. 4. Characterization and applications of delivery systems.
Sommario/riassunto	Improved technologies for the encapsulation, protection, release and enhanced bioavailability of food ingredients and nutraceutical components are vital to the development of future foods. Encapsulation technologies and delivery systems for food ingredients and nutraceuticals provides a comprehensive guide to current and emerging techniques.Part one provides an overview of key requirements for food ingredient and nutraceutical delivery systems, discussing challenges in system development and analysis of interaction with the human gastrointestinal tract. Processing technologies for enca
