

1. Record Nr.	UNINA9910461785103321
Titolo	Citizen science [[electronic resource]] : public participation in environmental research / / edited by Janis L. Dickinson and Rick Bonney ; foreword by Richard Louv ; afterword by John W. Fitzpatrick
Pubbl/distr/stampa	Ithaca, : Comstock Pub. Associates, c2012
ISBN	0-8014-6442-0 0-8014-6395-5
Descrizione fisica	1 online resource (304 p.)
Altri autori (Persone)	BonneyRick <1954-> DickinsonJanis L. <1955->
Disciplina	304.2072
Soggetti	Environmental sciences - Research - Citizen participation Environmental management Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- Foreword -- Notes on Contributors -- Acknowledgments -- Introduction: Why Citizen Science? / Dickinson, Janis L. / Bonney, Rick -- Part I. The Practice of Citizen Science -- 1. Overview of Citizen Science / Bonney, Rick / Dickinson, Janis L. -- 2. Projects and Possibilities: Lessons from Citizen Science Projects -- From Backyard Observations to Continent-Wide Trends: Lessons from the First Twenty-Two Years of Project Feederwatch / Bonter, David N. -- Monitoring Monarchs: Citizen Science and a Charismatic Insect / Oberhauser, Karen S. -- Neighborhood Nestwatch: Mentoring Citizens in the Urban Matrix / Marra, Peter P. / Reitsma, Robert -- Project BudBurst: Citizen Science for All Seasons / Henderson, Sandra / Ward, Dennis L. / Meymaris, Kirsten K. / Alaback, Paul / Havens, Kayri -- Using Bioinformatics in Citizen Science / Kelling, Steve -- 4. Growing the Base for Citizen Science: Recruiting and Engaging Participants / Chu, Miyoko / Leonard, Patricia / Stevenson, Flisa -- 5. What Is Our Impact?: Toward a Unified Framework for Evaluating Outcomes of Citizen Science Participation / Phillips, Tina / Bonney, Rick / Shirk, Jennifer L. -- Part II. Impacts of Citizen Science on Conservation

Research -- 6. The Opportunities and Challenges of Citizen Science as a Tool for Ecological Research / Cooper, Caren B. / Hochachka, Wesley M. / Dhondt, André A. -- 7. Widening the Circle of Investigation: The Interface between Citizen Science and Landscape Ecology / Zuckerberg, Benjamin / Mcgarigal, Kevin -- 8. Using Data Mining to Discover Biological Patterns in Citizen Science Observations / Fink, Daniel / Hochachka, Wesley M. -- 9. Developing a Conservation Research Program with Citizen Science / Hames, Ralph S. / Lowe, James D. / Rosenberg, Kenneth V. -- 10. Citizens, Science, and Environmental Policy: A British Perspective / Greenwood, Jeremy J.D. -- Part III. Educational, Social, and Behavioral Aspects of Citizen Science -- 11. Cognitive Considerations in the Development of Citizen Science Projects / Jordan, Rebecca C. / Ehrenfeld, Joan G. / Gray, Steven A. / Brooks, Wesley R. / Howe, David V. / Hmelo-Silver, Cindy E. -- 12. Who Poses the Question? Using Citizen Science to Help K-12 Teachers Meet the Mandate for Inquiry / Trautmann, Nancy M. / Shirk, Jennifer L. / Krasny, Marianne E. -- 13. A Gateway to Science for All: Celebrate Urban Birds / Purcell, Karen / Garibay, Cecilia / Dickinson, Janis L. -- 14. Children and Nature: Following the Trail to Environmental Attitudes and Behavior / Wells, Nancy M. / Lekies, Kristi S. -- 15. Internet-Based Social Networking and Collective Action Models of Citizen Science: Theory Meets Possibility / Triezenberg, Heather A. / Knuth, Barbara A. / Yuan, Y. Connie / Dickinson, Janis L. -- 16. A Role for Citizen Science in Disaster and Conflict Recovery and Resilience / Tidball, Keith G. / Krasny, Marianne E. -- Afterword / Fitzpatrick, John W. -- Literature Cited -- Index

Sommario/riassunto

Citizen science enlists members of the public to make and record useful observations, such as counting birds in their backyards, watching for the first budding leaf in spring, or measuring local snowfall. The large numbers of volunteers who participate in projects such as Project FeederWatch or Project BudBurst collect valuable research data, which, when pooled together, create an enormous body of scientific data on a vast geographic scale. In return, such projects aim to increase participants' connections to science, place, and nature, while supporting science literacy and environmental stewardship. In Citizen Science, experts from a variety of disciplines—including scientists and education specialists working at the Cornell Lab of Ornithology, where many large citizen science programs use birds as proxies for biodiversity—share their experiences of creating and implementing successful citizen science projects, primarily those that use massive data sets gathered by citizen scientists to better understand the impact of environmental change. This first and foundational book for this developing field of inquiry addresses basic aspects of how to conduct citizen science projects, including goal-setting, program design, and evaluation, as well as the nuances of creating a robust digital infrastructure and recruiting a large participant base through communications and marketing. An overview of the types of research approaches and techniques demonstrates how to make use of large data sets arising from citizen science projects. A final section focuses on citizen science's impacts and its broad connections to understanding the human dimensions and educational aspects of participation. Citizen Science teaches teams of program developers and researchers how to cross the bridge from success at public engagement to using citizen science data to understand patterns and trends or to test hypotheses about how ecological processes respond to change at large geographic scales. Intended as a resource for a broad audience of experts and practitioners in natural sciences, information science, and social sciences, this book can be used to better understand how to

improve existing programs, develop new ones, and make better use of the data resources that have accumulated from citizen science efforts. Its focus on harnessing the impact of "crowdsourcing" for scientific and educational endeavors is applicable to a wide range of fields, especially those that touch on the importance of massive collaboration aimed at understanding and conserving what we can of the natural world.
