Sommario/riassunto	From the 1930s, British anthropology was dominated by social anthropologists, an achievement of the two founding fathers, Bronislaw Malinowski and A.R. Radcliffe-Brown. However, the field of ethnology had originated in Britain in the 1840s and was well established before the rise of social anthropology. The essays in this volume explore the development of British anthropology in the period from 1880 to 1920, and deal with such diverse issues as the establishment of new research

methodologies, the development of ethnographic reporting,
institutional change and the professionalization of the

Sommario/riassunto

As China joins the capitalist world economy, the problems of social disintegration that gave rise to the earlier revolutionary social movements are becoming pressing. Instead of viewing the Chinese Revolution as an academic study, these essays suggest that the motifs of the Revolution are still alive and relevant. The slogan "Farewell to Revolution" that obscures the revolutionary language is premature. In spite of dislocations and ruptures in the revolutionary language, to rethink this discourse is to revisit a history in terms of sedimented layers of linguistic meanings and political aspirations. Earlier meanings of revolutionary words may persist or coexist with non-revolutionary rivals. Recovery of the vital uses of key revolutionary words proffers critical alternatives in which contemporary capitalist myths can be contested.
