Sommario/riassunto	Indigenous knowledge has become a catchphrase in global struggles

for environmental justice. Yet indigenous knowledges are often viewed, incorrectly, as pure and primordial cultural artifacts. This collection draws from African and North American cases to argue that the forms of knowledge identified as "indigenous" resulted from strategies to control environmental resources during and after colonial encounters. At times indigenous knowledges represented a "middle ground" of intellectual exchanges between colonizers and colonized; elsewhere, indigenous knowledges were defined through conflict

Sommario/riassunto

Infants, children and adolescents with congenital heart disease (CHD) are a challenge to manage and an ever-increasing number are reaching adulthood. CHD is one of the most important topics in cardiology today, yet this book is the only clinically-orientated monograph devoted exclusively to ventricular function and blood flow as it relates to CHD. Written by a distinguished panel of cardiologists, bioengineers, physiologists, and clinical investigators, Ventricular Function and Blood Flow in Congenital Heart Disease is an extensive and comprehensive presentati

Sommario/riassunto	In Europe today, HIV/AIDS prevention, treatment and care are needed more than ever. HIV incidence steady in western and central Europe, and dramatically increasing in eastern Europe remains a major challenge to public health in the 21st century. With more than two million people living with HIV/AIDS in the WHO European Region, no country has been spared. This book tells the story of HIV/AIDS in Europe from a broad variety of perspectives: biomedical, social, cultural, economic and political. The authors are leading experts from across the Region and include both the infected and the affected,
