Sommario/riassunto	Between 1550 and 1800 the Northern Netherlands went through a

period of intense economic development. This did not leave the surrounding regions untouched. International trade blossomed, tens of thousands of foreign workers found employment in the Netherlands and many millions of guilders were channelled abroad to finance foreign commercial undertakings and government policies. This book offers the first systematic analysis of the international impact of Dutch economic development and investigates the economic consequences of Dutch dominance in the areas bordering the North Sea.
