

1. Record Nr.	UNINA9910461904403321
Autore	Chinn William G
Titolo	First concepts of topology [[electronic resource]] : the geometry of mappings of segments, curves, circles and disks / / by William G. Chinn and N.E. Steenrod
Pubbl/distr/stampa	Washington, D.C., : Mathematical Association of America, 1966
ISBN	0-88385-933-5
Descrizione fisica	1 online resource (169 p.)
Collana	The Anneli Lax new mathematical library ; ; 18
Altri autori (Persone)	SteenrodNorman Earl <1910-1971.>
Disciplina	514
Soggetti	Topology Geometry Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	""Front Cover""; ""First Concepts of Topology: The Geometry of Mappings of Segments, Curves, Circles, and Disks""; ""Copyright Page""; ""Contents""; ""Introduction""; ""Part I: Existence Theorems in Dimension 1""; ""1. The first existence theorem""; ""2. Sets and functions""; ""3. Neighborhoods and continuity""; ""4. Open sets and closed sets""; ""5. The completeness of the real number system""; ""6. Compactness""; ""7. Connectedness""; ""8. Topological properties and topological equivalences""; ""9. A fixed point theorem""; ""10. Mappings of a circle into a line"" ""11. The pancake problems""""12. Zeros of polynomials""; ""Part II: Existence Theorems in Dimension 2""; ""13. Mappings of a plane into itself""; ""14. The disk""; ""15. Initial attempts to formulate the main theorem""; ""16. Curves and closed curves""; ""17. Intuitive definition of winding number""; ""18. Statement of the main theorem""; ""19. When is an argument not a proof?""; ""20. The angle swept out by a curve""; ""21. Partitioning a curve into short curves""; ""22. The winding number $W(I^1, I^3)$""; ""23. Properties of $A(I^1, I^3)$ and $W(I^1, I^3)$""; ""24. Homotopies of curves"" ""25. Constancy of the winding number""""26. Proof of the main theorem""; ""27. The circle winds once about each interior point""; ""28. The fixed point property""; ""29. Vector fields""; ""30. The equivalence

of vector fields and mappings""; ""31. The index of a vector field
around a closed curve""; ""32. The mappings of a sphere into a plane"";
""33. Dividing a ham sandwich""; ""34. Vector fields tangent to a
sphere""; ""35. Complex numbers""; ""36. Every polynomial has a zero"";
""37. Epilogue: A brief glance at higher dimensional cases""; ""Solutions
for Exercises""; ""Index""
""Back Cover""

Sommario/riassunto

Over 150 problems and solutions.
