What of the future?; Resources beyond the school gate; The issue of authenticity; Institutional treadmills; We know better songs than these; References; Index
Sommario/riassunto	'There are countless gems within these pages ... Swanwick seems to write from more experience as a musician and teacher than most

others who write for this audience. There is a real sense of his having been there.' - Patricia Shehan Campbell, Professor of Music, University of Washington, USA'... contains the essential and highly valued hallmark of its author: well-articulated philosophy that will surely filter through to practical work in classrooms.' - British Journal of Music Education'Among the virtues of this thoughtfu

Dalian Ascendas IT Park

Sommario/riassunto

China's booming economy has drawn both admiration and fear from the rest of the world. With its ability to churn out high-quality goods at low prices, China has become known as the "factory of the world". To better understand China's development and modernisation since the 1978 reforms, it is necessary to analyse its policies on importing technologies and developing indigenous ones. The articles in this volume paint a comprehensive picture of the attempts by the Chinese government to adopt and foster science and technology, the successes of the policies and the continuing challenges.
