#### Sommario/riassunto

Are established economic, social and political practices capable of dealing with the combined crises of climate change and the global economic system? Will falling back on the wisdoms that contributed to the crisis help us to find ways forward or simply reconfigure risk in another guise? This volume argues that the combination of global environmental change and global economic restructuring require a re-thinking of the priorities, processes and underlying values that shape contemporary development aspirations and policy. This volume brings together leading scholars to address these qu
